SUMMARY

Full-stack web developer leveraging a BA in Media and Information Technology from Michigan State University with a focus in creating human centered technology. Strong work ethic that comes from years of working 2+ jobs while going to school full time and the ability to juggle competing priorities successfully. Currently earning a certificate in full stack development from Michigan State University in partnership with Trilogy Education, with recently developed skills in HTML, CSS, JavaScript and the MERN stack. Strengths in hands on learning, meeting deadlines, teamwork, positive problem solving attitude, and creative approaches. With every project, my aim is to use my background in Media and Information to create web pages for an impactful user experience. Excited to work with a team to leverage my skills and build upon them to create high quality responsive web pages.
